LIST OF FIGURES

Figure 3-1 Monthly average ex-works price of 95% haloxyfop-P-methyl technical in China, 2020–2022

Figure 3-2 Annual average ex-works price of 95% haloxyfop-P-methyl technical in China, 2018–2022

1 Executive summary

In 2022, the ex-works price of haloxyfop-P-methyl technical in China rebounded sharply, owing to the rising cost of raw materials: the ex-works price of CCMP has decreased by nearly 40% YoY from the beginning of 2022 to the end of 2022. The price of haloxyfop-P-methyl technical in Nov. 2022 was about USD29,688.82/t, showing a downward trend.

During 2018–2022, the varieties of haloxyfop-P-methyl for export decreased. As of 2022, haloxyfop-P-methyl export products included 96% technical, 95% technical, 97% technical, 98% technical, 108g/L EC, 480g/L EC and 520g/L EC, by specification.

From 2018 to 2022, China's total export volume (converted to 100% AI) of haloxyfop-P-methyl products reached the peak in 2022. China's total export volume (converted to 100% AI) of haloxyfop-P-methyl products increased from 2,039.959 tonnes in 2021 to 3,151.457 tonnes in 2022, up 54.49% year on year. The price of haloxyfop-P-methyl products showed an upward trend from 2021 to 2022. In 2023, the export volume is expected to remain stable or further increase.

With the implementation of the "Action Plan for Chemical Pesticide Reduction by 2025" and the "Implementation Plan for Establishing a Sound Carbon Peak Carbon Neutrality Standard Measurement System", higher requirements have been put forward for enterprises in the pesticide industry. For enterprises that develop and produce efficient and low-risk pesticides with good prevention and production efficiency and low dosage, they will be able to gain certain advantages in the future pesticide market.

Affected by the price of raw materials, the ex-works price of Chinese haloxyfop-P-methyl technical down regulation in 2022. The price was about USD29,688.82/t, down 28.08% year in Nov. 2022 and the prices will continue to decline and remain stable in the next two years (2024–2025).

2 Introduction and methodology

Introduction

Price Trend of Haloxyfop-P-methyl in China to 2025. It attaches importance to the following parts:

- Price of haloxyfop-P-methyl in China, 2018–2022
- Influencing factor analysis of price of haloxyfop-P-methyl, including registration, export and policies
- Forecast on price of haloxyfop-P-methyl in China to 2025

The data is based on various sources as mentioned in the methodology below.

Methodology

Desk research

Sources of desk research are various including published magazines, journals, government statistics, industrial statistics, customs statistics, associated seminars as well as information from the Internet. A lot of work has been done to compile and analyse the information obtained. When necessary, checks were made with Chinese market players regarding market information such as production, demand, consumption, competition, etc.

Telephone Interview

The interviewees cover:

- Pesticide producers
- Agricultural experts
- Traders
- Local governments
- Researchers
- Peasants
- Associations

CCM carried out extensive telephone interviews with all producers of haloxyfop-P-methyl technical and many producers of formulations. From those active producers, potential producers, even producers who stopped production, CCM sourced and verified the detailed production information and market situation as well as players' comments on haloxyfop-P-methyl.

In a bid to understand the application situation of haloxyfop-P-methyl formulations in China, CCM also made contact with domestic traders, sellers and peasants as well. To directly analyse the import and export situation of haloxyfop-P-methyl technical and formulations, many importers and exporters were contacted whenever the verification was needed.

Those raw material suppliers are also contacted to get the price, supply as well as governmental policies of raw materials and their impact on haloxyfop-P-methyl.

Data processing and presentation

The data from various channels have been combined to make this report as precise and scientific as possible. Throughout the process, a series of internal discussions were held in order to analyse the data and draw conclusions from them.

Glossary

In this report, there are many abbreviations for specifications of haloxyfop-P-methyl formulations and intermediate products. They are listed as follows:

AI: Active ingredient

CAGR: Compound annual growth rate

CCMP: 2-Chloro-5-chloromethylpyridine

TC: Technical

EC: Emulsifiable concentrate

ME: Micro-emulsion

OD: Oil dispersion

EW: Emulsion, oil in water

Haloxypop-P-methyl is defined as haloxypop-P-methyl technical in the report, if not specified.

Units

t: metric tonne, equal to tonne in this report

kg: kilogram

t/a: tonne per year, also metric tonne per year, also tonne/year

RMB: currency unit in China, also called Yuan

USD: currency unit in the US

Table 2-1 USD/CNY exchange rates, Jan. 2018–Dec. 2022

3 Price of haloxyfop-P-methyl in China, 2018–2022

In 2022, the ex-works price of haloxyfop-P-methyl technical in China rebounded sharply, owing to the rising cost of raw materials: the ex-works price of CCMP decreased by nearly 40% in late 2022 compared to that in early 2022. Besides, demand from abroad boosted—China's 2022 export of haloxyfop-P-methyl products increased by over 50% year on year.

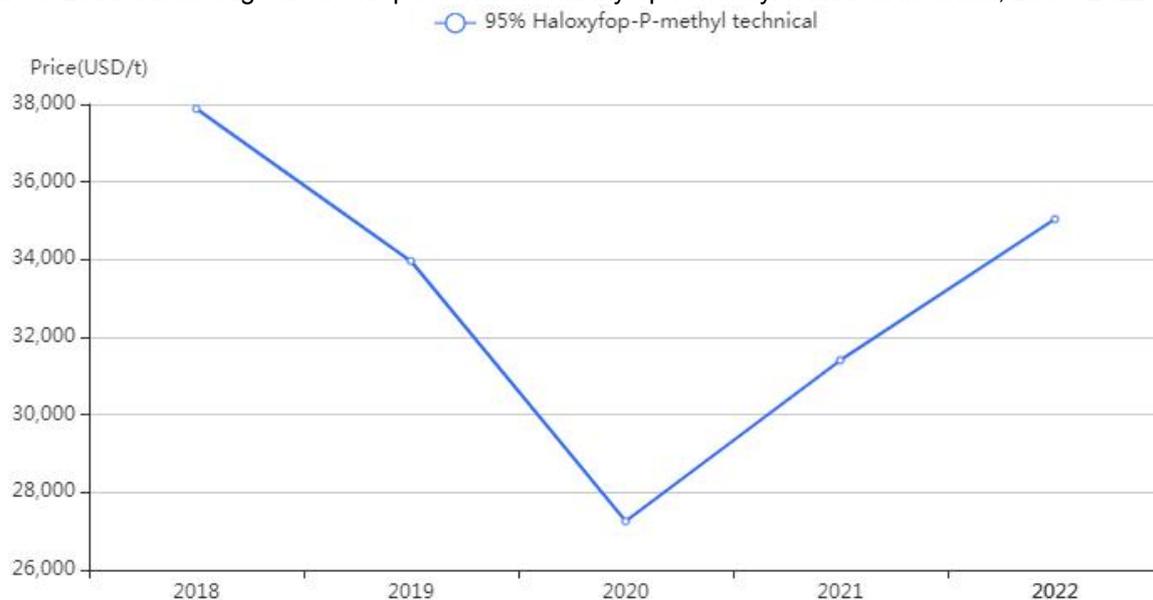

During 2018–2020, afflicted by the sluggish downstream market demand, the ex-works price of haloxyfop-P-methyl technical in China witnessed a downtrend generally. During 2020–2022, the ex-works price of haloxyfop-P-methyl technical in China saw growth thanks to the increased overseas demand and rising prices of raw materials.

4 Influencing factor analysis of price of haloxyfop-P-methyl

4.1 Registration of haloxyfop-P-methyl in China

As of 1 June, 2023, there are 160 valid registrations of haloxyfop-P-methyl products owned by 154 companies in China, 26 of which are technicals, according to the registration information from the Institute for the Control of Agrochemicals, Ministry of Agriculture and Rural Affairs of the People's Republic of China (ICAMA).

Table 4.1-1 Formulation type of haloxyfop-P-methyl registrations in China, as of 1 June, 2023

No.	Type of formulation	Number of registration	Share
1	EC	127	79.38%
2	TC	26	16.25%
3	ME	6	3.75%
4	EW	1	0.62%
Total		160	100.00%

4.2 Export analysis

During 2018–2022, the varieties of haloxyfop-P-methyl for export decreased. As of 2022, haloxyfop-P-methyl export products included 96% technical, 95% technical, 97% technical, 98% technical, 108g/L EC, 480g/L EC and 520g/L EC, by specification.

From 2018 to 2022, China's total export volume (converted to 100% AI) of haloxyfop-P-methyl products reached the peak in 2022, rising to 3,151.457 tonnes in 2022 from 2,039.959 tonnes in 2021, up by 54.49% year on year, with the prices representing a growing trend. In 2023, the export volume is expected to remain stable or further increase.

China exported haloxyfop-P-methyl products to 57 countries and regions from 2018 to 2022. In addition, in 2022, only 28 countries imported haloxyfop-P-methyl products from China.

4.3 Policies

In China, pesticides are strictly supervised by general or special governmental departments, with a complete management system for pesticides and the pesticide industry, including laws, rules and regulations, standards, industrial policies, etc.

On 18 Nov., 2022, the Ministry of Agriculture and Rural Affairs of the People's Republic of China issued the "Action Plan for Reducing the Utilization of Chemical Pesticides by 2025", aiming to establish an environmental-friendly and ecologically inclusive comprehensive prevention and control technology system for prevention and control of crop diseases and pests by 2025, refining the variety structure of pesticide, comprehensively raise the level of scientific and safe pesticide utilization technology and sustainably diminish the total utilization amount of chemical pesticide. Therefore, enterprises engaging in developing and producing cost-effective and low-risk pesticides are expected to obtain certain advantages in the future pesticide market.

On 25 Dec., 2022, the State Council issued the Development of Modern Logistics During the 14th Five-Year Period, in seeking to elevate product quality, increase efficiency, reduce the cost of modern logistics, form a robust domestic market and provide support and assistance for opening up to the world. By 2025, works of establishing a safe and high-efficiency logistics system with sound supply and demand, smooth domestic and international circulation should be complete, offering assistance for the circulation of goods and import and export trade.

On 1 Nov., 2022, the General Administration of Market Supervision, in collaboration with other eight departments issued the Implementation Plan for Establishing the Standardised Measurement System for Carbon Peak and Carbon Neutrality, with the main objectives of the plan as follows:

- By 2025, the standardised measurement system for carbon peak and carbon neutrality should be established, elevating the carbon-related measurement benchmarks and ensuring the basic capability of measuring carbon emissions from key emission units.
- By 2030, the standardised measurement system for carbon peak and carbon neutrality should be perfected, persistently improving the carbon-related measurement technology and management and developing the carbon measurement service market.
- By 2060, efforts should be made to set up a much more high-efficiency service capability with advanced technology and outstanding management and achieve the full completion of the standardised measurement system for carbon peak and carbon neutrality, realizing the carbon neutrality goal.

5 Forecast on price of haloxyfop-P-methyl in China to 2025

Affected by the prices of raw materials, the ex-works price of Chinese haloxyfop-P-methyl technical decreased in 2022. The price was about USD29,688.82/t, down by 28.08% year on year in Nov. 2022 and the prices will continue to decline or remain stable in the next two years to come (2024–2025).

Due to the reduced CCMP prices, the prices of haloxyfop-P-metal were also continuously decreasing in 2022. It is predicted that the prices of CCMP and haloxyfop-P-metal would drop in the near future.

The production and supply changes of haloxyfop-P-metal producers may have a certain impact on prices. Weifang Xinlu Chemical Co., Ltd. will transform its existing haloxyfop-P-methyl TC lines with a production capacity maintaining at 3,000 t/a, and use the same lines to produce fluazifop-P-butyl TC, at the capacity of 500 t/a in 2022;
